Market Insight

● worldsteel Short Range Outlook October 2019

The World Steel Association (worldsteel) released its Short Range Outlook (SRO) for 2019 and 2020 on October 14, 2019. In 2019 worldsteel forecasts that steel demand in China will grow by 7.8% to reach 900.1 Mt and the rest of the world is expected to record 0.2% growth to 874.9 Mt. In 2020, Chinese steel demand is expected to grow by 1.0%, whereas steel demand in the rest of the world will grow by 2.5%.

Global steel demand will grow by 3.9% to 1,775.0 Mt in 2019 and will grow by another 1.7% in 2020, reaching 1,805.7 Mt.

Global steel demand remains resilient despite an uncertain global economic environment, driven by developing and emerging economies

Commenting on the outlook, Mr Al Remeithi, Chairman of the worldsteel Economics Committee said, “The current SRO suggests that global steel demand will continue to grow in 2019, more than we expected in these challenging times, mainly due to China. In the rest of the world, steel demand slowed in 2019 as uncertainty, trade tensions and geopolitical issues weighed on investment and trade. Manufacturing, particularly the auto industry, has performed poorly contracting in many countries, however in construction, despite some slowing, a positive momentum has been maintained.

While the global economic outlook is highly unpredictable, we expect to see further growth in steel demand in 2020 of 1.7%, with emerging and developing economies contributing more. This forecast faces significant downside risks if the current level of uncertainty prevails.”

Chinese steel demand showing high growth in 2019 owing to a strong real estate sector, but forecasted to slow down in 2020

Chinese steel demand is expected to grow by 7.8% in 2019, largely driven by real estate investment. In the first seven months of 2019 China’s real estate market reported the strongest performance over the same period for the last five years.

China’s steel demand is expected to see growth of 1.0% in 2020.

Steel demand in the developed world stagnates with weakening manufacturing

After growing by 1.2% in 2018, steel demand in the developed economies is expected to show a small contraction of -0.1% in 2019. The consumer sectors and construction maintained positive momentum, however manufacturing slumped due to a deteriorating environment for export and investment. In 2020, with the effect of some technical rebound, steel demand in the developed world is expected to grow by 0.6%.

Developing economies present a mixed picture, but high growth is expected in Asia

Growth of steel demand in the emerging economies excluding China is expected to slow down to 0.4% in 2019 due to contractions in Turkey, MENA and Latin America. But the growth is expected to rebound to 4.1% in 2020 due to infrastructure investments, especially in Asia.

- **China vows to upgrade energy production, consumption, ensure energy security**

China will promote the transformation and upgrading of energy production and consumption, and safeguard energy security in a bid to improve people's livelihood, according to a meeting presided over by Premier Li Keqiang on Friday.

As coal accounts for a major part of China's energy consumption, efforts are needed to make scientific coal exploration plans and promote green coal mining, Li said.

Li also stressed facilitating energy savings by enhancing energy conservation in key areas including transportation and construction, advocating green lifestyles and consumer culture as well as promoting the application of energy-saving products.

International Data

● Ferrosilicon Exports in August and from January to August

According to data from China Customs, for the month of August, 2019, China exported a total of 23038.369 tons of ferrosilicon ($>55\%$), down by around 9.88% vs. the July, down by 51.95% vs. the same period in 2018.

In August, China exported 7596 tons of ferrosilicon ($>55\%$) to Korea, about 32.97% of the total exports in August, and exported 5284.05 tons to Japan, about 22.94% of the total exports in August.

For the first eight months of 2019, China exported 266745.693 tons of ferrosilicon ($>55\%$) in total, down by 28.23% vs. the same period in 2018. Including 86505.457 tons to Japan, about 32.43% of the total exports from January to August, and 62943.1 tons to Korea, accounts for around 23.6%.

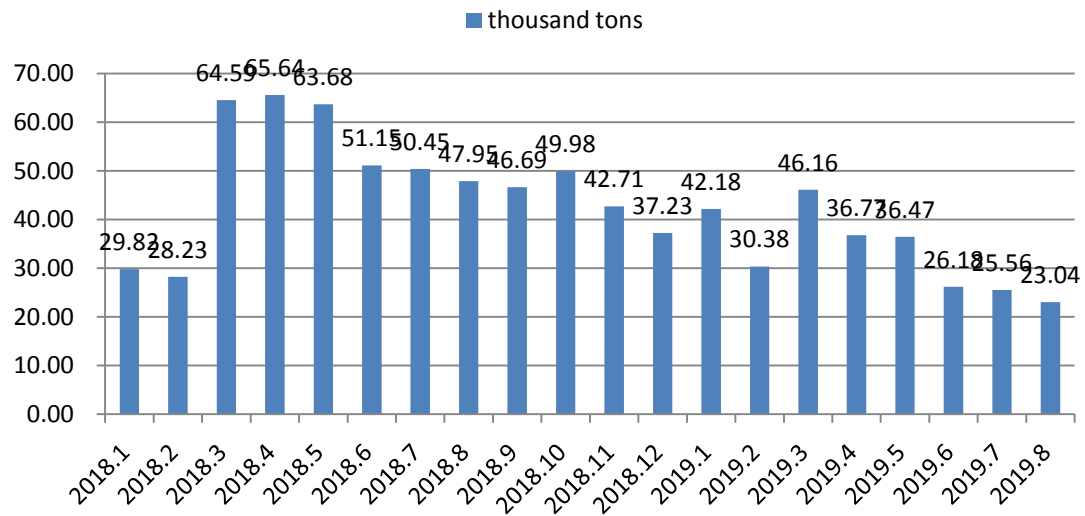

For the month of August, China exported a total of 2203.023 tons of ferrosilicon ($\leq 55\%$), up by 16.7% than July and down by 13.08% than the same period in 2018.

In August, China exported 638 tons of ferrosilicon ($\leq 55\%$) to Korea, about 28.96% of the total exports in August, and exported 499 tons to Japan, about 22.65%.

For the first eight months of 2019, China exported 20989.859 tons of ferrosilicon ($\leq 55\%$), up by about 10.39% than the same period in 2018.

From January to August, China exported 7027.05 tons of ferrosilicon ($\leq 55\%$) to Korea, about 33.48% of the total exports in the first months, and exported 4671.175 tons to Japan, about 22.25% of the total exports in the first months.
